

Design Suite Software

Computer software for contractors & wholesalers to streamline the quotation and heatloss analysis process

The HeatLink® Design Suite is composed of 2 modules that can be used together or separately:

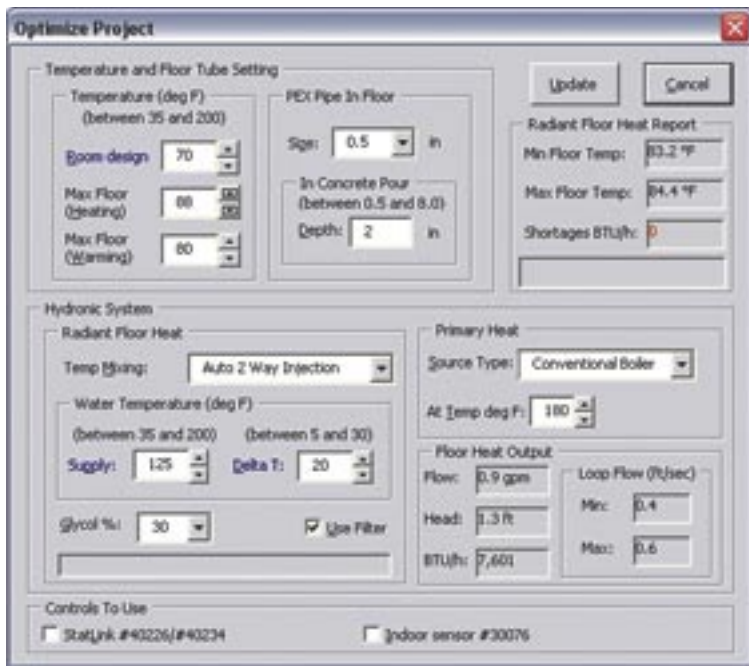

- **Budget module:** In less than 10 minutes the user is able to create a price quote for a HeatLink radiant floor heating design.
- **HeatLoss module:** Whether you are starting from scratch, or from the Budget Module, HeatLoss produces accurate calculations for heat load, friction head, water flow, and water temperature.

Benefits

- It's easy to-use, accurate and saves time.
- Access to suggested mechanical piping and electrical wiring schematics.
- Easy reference to design related topics, including: the impact of pipe size and spacing on system performance.
- Weather data provides outdoor design temperatures for most Canadian and US cities.
- Input your own custom material list in price quote.
- R-values reference access for standard construction materials.
- Calculate the composite R-value of assembled standard construction materials.
- Overview of system design parameters, allowing you to tweak design inputs to view instant impact on system performance.
- Input and report sheets can be printed
- Quickly look up job specifications pertinent to your project.
- Multiple projects can run simultaneously.
- Enhanced input error detection function, alerts user about missing input data.

New Features in v3

- Improved ease of use to reduce time in creating a quote.
- Enhanced indication of pipe and pump sizing.
- Input your own custom material list in price quote.
- Zoom in and out of recommended piping and wiring schematic drawings for details, before being sent to a color printer.
- R-value lookup or calculation without first running a project file.
- Fully integrates with Microsoft® Outlook® and Excel® (required; see requirements section for available Microsoft® Office versions).
- Custom control over the work environment including warning message and error detection.
- Product description and project specification can be outputted to a color printer.
- Automatic paper length setting for printing reports.
- Latest product reference numbers (SKU#).
- Latest product pricing from HeatLink.

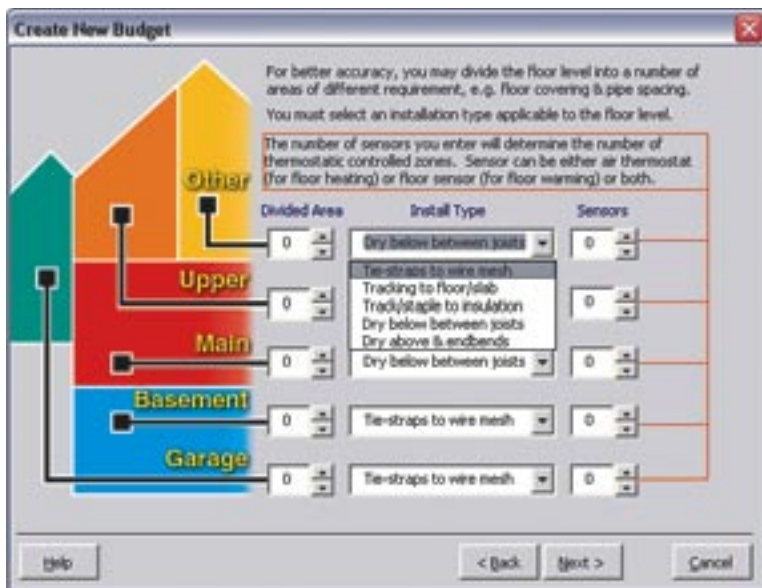

Software Requirements

- Microsoft® Excel® and Microsoft® Outlook® from the same version of Microsoft® Office (2000, XP/2002, or 2003).
- Microsoft® Windows® 2000 or later.
- Microsoft® Internet Explorer®

Please Note: Outlook® is different than Outlook® Express. The HeatLink® Design Suite program will not work if Outlook® Express is setup as the only email program.

Design Services

Design services are available for a fee. Please contact us for details.
